As air circulates though an HVAC system, many airborne microorganisms, odors, and other organics are so small they pass through the best filtration.

- **Today’s more tightly constructed homes increase energy efficiency, but are more susceptible to indoor air contamination.**

- According to the EPA, air pollution levels inside a typical home can be 2 to 5 times higher than outdoor air, and sometimes more than 100 times higher.

Solaris air purification works to get indoor air pollution under control—particularly odors, toxic gases and bio-contaminants—using the disinfection and oxidizing power of UV light, photocatalytic oxidation, and positive and negative ions that freshen the air in the same way a thunderstorm purifies outdoor air!
Solaris® goes beyond filtration to eradicate germs, allergens, odors, and VOC/chemical pollution.

This level of air purification can only be accomplished using multiple technologies:

- Photocatalytic + Silver/Zinc Ion Contaminant Oxidation
- 4XNP Ion/Plasma Generator
- Germicidal UV Light

Solaris silently purifies the air circulating through your HVAC system to freshen the air in every room of your home or office.

Solaris® is the culmination of more than 20 years of experience in the application of UV light and other technologies for disinfection and decontamination.

- Breaks down household odors from kitchens to laundry rooms—even bathroom and pool odors
- Kills bacteria and viruses circulating in the air and on surfaces
- Electrically charges microscopic particulate pollution, enabling capture in household air filters

Available with Optional Solaris® EZ UV light to connect to your Solaris purifier for HVAC coil and interior surface disinfection.

Features:

- Photocatalytic odor control
- Dual Spectrum UV HVAC airstream disinfection
- Superior PCO Performance
- Freshens the air
- Reduces extremely fine suspended particulates
- Exclusive PCO adjustability
- Whole house coverage
- Electronic monitoring
- Easily expanded
- 18,000 hour UV lamp life
- Auto shut-off
- Stainless steel cabinet
- Microprocessor control
- Lamp status
- Warranty

Optional Solaris® EZ UV light

Eliminate HVAC bio-growth while increasing cooling efficiency! Connect a germicidal EZ UV light to your Solaris purifier for HVAC coil and interior surface disinfection. The upgrade kit comes with a UV lamp and Solaris quick connector.

Solaris IAQ.com
How to buy

Solaris IAQ products are sold and installed by HVAC Professionals

Proper integration of a Solaris® Air Purifier into an HVAC system takes the expertise of an HVAC contractor, who can evaluate IAQ improvement needs and HVAC equipment to determine the best IAQ product(s) to accomplish your goals. Just as important, an HVAC technician is best qualified to install IAQ products that integrate with HVAC equipment. This will assure optimum performance for the entire system.

Call your HVAC contractor today for more information.

Solaris® air purifiers are designed and manufactured in USA by
